3. Electricity and Circuits

This part covers the basics of electric current, voltage, resistance, and how circuits function.

4. Modern Physics Concepts

Some chapters include discussions on atomic structure, nuclear physics, or quantum mechanics.

Common Questions and Their Answer Keys

Below are typical questions from Chapter 21, accompanied by detailed answer keys to help you

verify your understanding.

Question 1: What is the First Law of Thermodynamics?

Answer: The First Law of Thermodynamics states that energy cannot be created or destroyed in an isolated system. It is often expressed as:

?U = Q - W

where:

- ?U is the change in internal energy of the system,
- Q is the heat added to the system,
- W is the work done by the system.

This law emphasizes the conservation of energy during thermal processes.

Question 2: Describe the difference between transverse and longitudinal waves.

Answer:

- **Transverse Waves:** The particle displacement is perpendicular to the direction of wave propagation. Examples include waves on a string or surface water waves.
- **Longitudinal Waves:** The particle displacement is parallel to the direction of wave propagation. Sound waves in air are a common example.

Question 3: How is electrical resistance affected by temperature?

Answer:

- For most conductors, resistance increases as temperature increases due to increased atomic vibrations that impede electron flow.
- In some materials like superconductors, resistance drops to zero below a critical temperature.

Question 4: What is the significance of the wave frequency?

Answer: The frequency of a wave determines its energy and color (in the case of light). It is inversely related to wavelength as per the wave equation:

c = ?f

where c is the wave speed, ? is wavelength, and f is frequency.

Question 5: Explain the concept of electrical current.

Answer: Electrical current is the flow of electric charge through a conductor, typically measured in amperes (A). It results from the movement of electrons and is driven by a voltage difference across the circuit.
